While not as extensive as the Istivan DLC this pack does one thing that that no other one does

and what is that

Adds Leman "sing" Russ

as a big fanboy of both 30-40k i cannot help but sing joyus songs whilst beating the out of Horus as The Russ

as for Prospero itself it is a fun objective to work on the side if you find yourself on that part and is kinda funny to be all like

'this noise im hiding in prospero'

i recomend it
